## **REASON FOR ALLOWANCE**

1. Bear et al discloses an axle assembly comprising, in combination an axle tube having a first end and a second end, a mounting module formed as a unitary extension of the axle tube; a hub positioned near the first end of the axle tube wherein the mounting module comprises at least one of a yoke having a pair of opening, a shock absorber attachment bracket, a stay bar attachment bracket, an upper control arm attachment bracket, a lower control arm attachment bracket, a spring seat, a jounce bumper bracket, a steering damper attachment bracket, and a track bar attachment bracket. The differential carrier comprises one of ductile iron and aluminum. Dodge, Barnholt, and Diessner disclose various types of axle assembly comprising, in combination an axle tube having a first end and a second end, and at least one steel insert rivet positioned near the first end of the axle tube to be filled to a differential carrier. However, none of the references of record suggests an axle assembly comprising a mounting module formed as an extension of the axle tube, wherein at least one steel insert positioned near the first end of the axle tube is adapted to be welded with a differential carrier to secure the axle tube to the differential carrier in the manner defined in the instant claims 1, 6, 8 and in combination with other limitations of the claims. Therefore, claims 2-5, 7, 9-12, depending therefrom, are considered to be allowable.

## Conclusion

2. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Frantz F. Jules whose telephone number is (703) 308-

Art Unit: 3617

8780. The examiner can normally be reached on Monday-Thursday and every other Friday.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Joseph S. Morano can be reached on (703) 308-0230. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
